Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Claims 29, 30, 35 and 38-39 are rejected under 35 U.S.C. 102(b) as being anticipated by applicant's admission in

Art Unit: 1657

claim 38 that "a commercially available detection device adapted to determine the activity or the concentration of the protein using the sensitivity coefficient for each substrate and for each protein". A new use for an old device is not patentable.

Conclusion

No claim is allowed.

The reference of record reveal that the disclosed method of determining a sensitivity coefficient as described in the specification on page 7 appears to be novel. Note all the present claims are directed to a device. A new use for an old device is not patentable.
